Centered.

The image is a design sketch for an umbrella. It features two main views: a top-down view of an open umbrella and a side profile view of a closed umbrella. The top-down view shows a dark brown canopy with a white reflective edge and a central hub with eight ribs. The side view shows a dark, sleek umbrella with a black shaft and a black handle. To the left of the top-down view, there is a block of text describing the umbrella's materials and sustainability. Below this text is a QR code and a URL. To the right of the top-down view, there are three hangtag designs. Each hangtag is rectangular with a hole at the top. The first hangtag is yellow and features the text 'Most umbrellas keep you dry.', 'This one protects people and the planet too.', and '100% PFAS free'. The second hangtag is dark brown and features the text 'Sustainability in every drop.' and the 'AD CO.' logo. The third hangtag is light pink and features the text '100% PFAS free', 'Recycled polyester (rPET)', 'Lower carbon footprint', 'Corporate Social Responsibility', and 'Free from harmful chemicals', along with the 'AD CO.' logo. At the bottom left, there is a QR code and a URL 'CHOOSE WISELY AT ADCOMPANY.SE'. Below the QR code, there is a short paragraph of text about the umbrella's sustainability efforts.

This umbrella is crafted in Xiamen, with fabric made from recycled polyester (R-PET) transforming discarded plastic bottles into a durable, stylish shield against the rain. By choosing R-PET, we reduce waste and give materials a second life, while ensuring full traceability from recycling to the final product. With a significantly lower carbon footprint than traditional fabrics, it's a wise choice for the planet.
